

User Manual: How to Run the App

Step 1: Install all of these dependencies using the following command in your terminal

```
pip install numpy pandas matplotlib scikit-learn imbalanced-learn tensorflow keras  
opencv-python-headless PyQt5
```

Step 2: Unzip the provided zipped folder and open the terminal in the “app” folder

Step 3: Run the following command on this terminal

```
python app.py
```

Wait for the app to load, it takes a few minutes.

Now you can use the app.
